

# The Sovereignty of

# ~ WATER ~

*By VivikaQi*

How can that be, you ask, aghast at such an insolent statement! Well, if that knocked your boots off, hang on tight for you're about to lose your socks as well . . . *WATER was not 'created' by God!* It was WITH God as He looked out over the void He claimed for His soon to be new creation of Earth and its universe, but nowhere in the new or old scriptures does it include 'water' in the unfathomable list of birthings in this specific Magnum Opus.

Scientist and author, Dr. Masaru Emoto, has proven the infallible authority of WATER over all other elements is clearly for Its:

## MEMORY

Being the only element in attendance at those first moments, WATER's first memory in the making of this universe was the beautiful Word 'Soham' – *"I AM THAT"* – spoken by God; the Soham<sup>1</sup> power reverberating in WATER's beautiful ripples and stored for the explicit purpose of implementing It into every next creation for the new world. WATER had already set itself up to perfectly impart God's Grace and DNA upon even merely the THOUGHT of new life from God! *Contemplate the tremendous power of that Holy Moment's Alliance!*

WATER goes on to participate in every aspect of Creation: an estimated two trillion galaxies; more than a septillion stars - each with their 1.6 planets; every sentient being; and every molecule and atom in every corner of this, our single specific universe. Mankind itself glorifies WATER through the body in its essential component of 70%; likewise, our one little blue planet, out of septillions, also honors WATER with nearly the same percentage on its surface and ultimately completing the glory throughout the width, depth, and untold places on Earth by the total WATER volume of around 1.386 billion cubic kilometers. Its Presence keeps those masses in remembrance of the Creators DNA – their very existence!

Now, bringing the phenomenon down to a more present and comprehensible level, and being also the only substance on the planet formed in three arrangements: liquids, solids, and gaseous, scientific studies under tailored and microscopic care have been performed to prove the existence of WATER's infallible memory.

Nassim Haremeini, Physicist claims: “‘SPACE’ is the only thing that connects all things – ‘Space’ is everywhere! – and WATER is an expression of that ‘Space.’ Any changes in the ‘Space’ will change the WATER . . . ALL life emerges from WATER because WATER is the medium from which ‘Space’ communicates with all living things.” WATER can even rise in trees against tens of atmospheres of pressure in a tree, against gravity, to communicate ‘life’ to its intended purpose.

WATER is a very good tool for dialoguing with external signals from ‘elsewhere’ – remember, our brain is the finest transmitter receiver, being 73% WATER in our 70% physical body WATER! Each one of us is a link in the transfer of information passed on through WATER, making us each also a ‘source’ of information. Every deed, thought, word, and emotion separates from us and becomes part of the overall environment. Left to this information transfer of negative energies would eventually lead to the death of WATER.

Through the dance of the molecules – how the structure of water is formed – WATER’s memory is within these structures as it retains traces of information from everything it touches, sees, and experiences . . . indeed, from Its first moments with God has carried all the images of future living organisms. WATER – BEING WATER, that data-thirsty element – merely absorbed the Creator’s Great Vision in that Moment and brought to life all intended preexisting conceptions, as strategically assigned.

*~ It can make one, at this point, breathless with awe when stopping to contemplate the ‘sovereign’ intelligence keeping our body alive, working even as we take that inner peek! ~*

Ancient sages believed that for life to arise, a primordial divine spark was imprinted in the WATER with the sequence of future development; the study of evolution has consistently provided harmonious evidence. It leads one to comprehend the ‘sovereignty’ of WATER is the result of Its very presence and entire purpose having begun with already being ‘meet for the Master’s Work’!

WATER is not only a vital presence in the beginning of every sentient being’s life, sustaining it throughout its lifetime, but it can also restore that life when maimed or near death. The restorative power of WATER has long been known, sensed, and utilized even in mankind’s primitive days.

The energy waves of WATER picking up surrounding compassion and love and then given to an ill person plays as great a part in healing as does a doctor’s prescription, as our forefathers from long ago instinctively knew. As well, drinking WATER in an unhealthy or angry setting has the effect of worsening an illness . . . ‘chronic’ is your ‘heads up’!

Mankind is so accustomed to the presence of WATER that we assume It's a neutral entity – yet It is the most living element of all and perpetually downloading our surrounding 'data' . . . seemingly on the sly! It is clear that WATER is one of the most sensitive indicators of any fields we have surrounding us. Every sentient being perceives their surrounding energies as specific for their existence; only WATER is able to absorb the entire range of frequencies. Even detecting changes in our universe, WATER immediately changes its properties both on Earth and within the bodies of living creatures.

Consider, then, the miles and miles of pipes repeatedly looped – with no break for cleansing fresh air and sunshine – through cities of high population, each entity (animals, plants, persons, etc) with their entire miasmic baggage of emotions and situations being 'downloaded' – with chemicals! – into the city drinking and bathing water! It puts a whole new 'spin' on 'we are all ONE'!

The average person ingests 16,000 gallons, with all the chemicals and negative energies compiling perpetually in their 60-year lifetime. Imagine the choice of WATER you drink and the effect on your 'old age' process . . . no wonder doctors move the elderly in and out of their 'stanchions' like cows in a chute! It's an easy vocation – like cookie cutter diagnoses – as due to a lifetime of ignorance about ONE element that could have made the difference: *we all share the same symptoms closely enough to make it the BIG 'DUH'!*

**GREAT NEWS!!** The most majestic of qualifications as the 'sovereignty' of WATER is Its ability to 'shift change' and return Itself back to the *perfect state of existence* as was in Its 'Moment' with God 'in the beginning.' Through its 'sovereign' endowment, Its three-way self-cleansing capacity happens at phase transition: evaporating, condensing, and falling as rain; OR when melting from Its frozen state; OR 'burned' by boiling. Each shakes off the grime and replenishes the Glory of that 'Moment' once again!

*WATER has memory!* Bouncing over rocks and tumbling over falls, all the while infusing fresh air and imprinting on Its molecules unique characteristics such as the longevity of coral and the essence of health – good OR bad.

"WATER keeps Its secret – 'the program for life' – as all information about life IS contained in WATER, waiting for the impulse of God to allow the organisms to be life . . . even jellyfish and fetus's. If we destroy this information we shall destroy life; without WATER, we wouldn't even have the DNA helix," states Alloys Gruber, Researcher.

Eliminate all plastics from (at least) your WATER and keep your WATER 'sovereign' through the use of stainless steel flasks or glass and glass liners. If you buy water in the plastic jugs, make sure you still put it through the 'burn-freeze-rain catcher' regimen to be rid of the dangerous and compounding chemicals. Everything in Nature's perfection has been created in accord with this program. He who created this World, transmitted 'the program of life' to every living creature . . . through WATER.

*~ BE KIND TO YOURSELF and start NOW, the clock's ticking faster than you think while all that 'shared information' is going on inside you! ~*

Those on their cognitive spiritual path will find enhanced access to/from the 'higher places' as their physical form and brain become detoxed and purified, by the pure act of pure WATER; add to it the information on 'diet'<sup>2</sup> to complete your preparation for 'abiding on the high places.'<sup>3</sup>

For the sake of your present health and excitement at a renewed potential of a truly 'golden' old age, change your WATER habits to the very best of your ability . . . right now . . . right where you are! Above all: REMEMBER the 'Sovereignty of WATER' as you use and drink It – giving thanks to God for such a powerfully thoughtful Gift.

*~ Can you even imagine the now purified WATER you're drinking and grateful for, Its very 'sovereign' molecules wiggling profusely in your favor! ~*

Dr. G.P. Flanagan, Scientist, claims, "Our lifespan is directly proportionate to the amount of antitoxins we have in our body. WATER is a vital carrier of antitoxins; ingesting the purified WATER, prepared as above, will slow the aging process."

*~ Dr. Emoto's lifelong efforts to find the perfect 'word' that most beautifully describes the phenomenal structures of WATER resulted in TWO words: LOVE and GRATITUDE. ~*
